Bauhaus

After researching many different graphic design movements I found the German Bauhaus school to be the most interesting and inspiring.

After looking through their designs I found them to be very interesting . They also stood out to me as a start of a hole new branding method in Graphic Design which is still used today.

My Poster

As part of unit 5 we are required to make our own poster which is similar to the graphic design movement we feel most inspired by. I like the simplicity and the colourfulness in the bauhaus designs. I have included this in my poster and made it very clear that it is inspired by bauhaus.

The next slides are my development of my poster and how I created the final piece.
